

Islamic Republic of Afghanistan
National Statistics and Information Authority

Afghanistan Statistical Yearbook 2018-19

Issue No: 40
July 2019

Executive Summary

It is a matter of great pleasure for National Statistics and Information Authority as the only official statistical body in the country to have been able to publish the statistical yearbook 2018-19 according to its publication calendar by timely data collection. This statistical yearbook depicts the socio-economic condition of the country and also provides an easy access to a rich source of statistical information and data which helps the ministries, government organizations, NGOs and the private sector as well as international community to formulate policies, programs and make evidence based decisions.

The data and statistical information in the statistical yearbook have been collected from ministries, government organizations and private sector providing data on economic and social sectors like population, agriculture, education, health, national accounts, consumer price index, energy, construction, mines and energy, services, foreign trade, finance statistics and foreign aids which can be used by the planners and data users for better and evidence based planning.

The country population is estimated to be 31.6 million including 1.5 million Kochi population for 2018-19 based on the socio-demographic statistics department of NSIA. Men and women make up 16.1 million and 15.5 million of the total population respectively. Based on the estimated population figures the urban population is 7.5 million while the rural population is 22.6 million. The rural and urban population is estimated without considering Kuchi population. The age-dependent population is 15.9 million while 15.1 million population of the country is under 15 years of age. The returning refugees from Pakistan, Iran and other countries were 2746 families comprising 15699 individuals in the year 2018-19.

The data on educational attainment of civil service employees working in government shows that in total 321054 employees there are 308 PhD, 7004 MA/MS 34219BA/BSc and 279523 employees have lower level of education than BA/BSc.

The Ministry of Education data shows that 9919474 students were enrolled in the primary, secondary, high schools, vocational high schools, technical vocational institutes, teacher training institutions, religious education and afghan students abroad in 2018-19. There were 9388010 students enrolled in government educational institutions and 531464 students in private educational institutions. The total number of teachers were 231949 in 2018 out of which 203201 were in government and 28748 were in private sector.

The higher education data indicates that in 2018-19 total number of students of the government higher education institutions together with that of the private sector educational institutions were 386778 which shows 5,7 percent increase compared to the data of last year. There were 286310 males and 100468 females. The number of government and private universities and higher education institutions reached to 169 in 2018. There are 131 private and 38 government universities and higher education institutions where only 9 private institution has increased comparing to 2017. Teachers of government and private universities have reached to 18095 where 2370 are female and 15725 are male.

The university teachers have been increased by 5,1 percent compared to 2017-18.

Data on public health indicates that in 2018 there are 2,408 health centers. There were 2,424 health centers throughout the country in 2017 which currently shows 0.7 percent decrease.

These health centers include sub-centers, basic and comprehensive health centers. In spite of decrease in health centers these facilities are not sufficient as there are only 5 beds and 3 medical doctors available per 10,000 people. Infectious diseases such as Malaria, Tuberculosis and AIDS existed in Afghanistan in 2018 where AIDs has increased in 2018. The number of people living with AIDS in 2018 is 2,689 which has increased by 5.5 percent compared to previous year.

The aforementioned increase is alarming and should be taken in to consideration.

GDP including poppy was Afs 1,478,707 Million (US\$ 20.5 billion) with GDP per capita of Afs 46,795 equal to US\$ 647.

GDP excluding poppy was Afs 1,438,691 Million (US\$ 19.9 billion) with GDP per capita of Afs 45,528 equal to US\$ 630.

The main reason of gross value added decrease in 1397 is the exchange rate increase against Afghani and population estimate.

The growth rate of real GDP including poppy in 2018-19 was -0.2%, while it was 2.7% excluding poppy.

CPI indicates that the level of inflation in Afghanistan the inflation rate was 0.6 percent in 2018-19 and shows a relative decrease compared to last year which was 5.0 percent. Based on the consumer price the highest inflation was in kapisa province by 4.8 percent and followed Helmand province by 4.3 percent. The data of food items show decrease of -1.1 percent and non-food items increased by 2.3 percent.

Agricultural data in the 2018 indicates that wheat production is 3.61 million metric tons which indicates 3.55 percent decrease as compared to the previous year. The reason for decrease in wheat production was decrease in the rainfall during 2018 particularly in wheat cultivated fields that solely depends on rain. The agricultural land under wheat, rice and other cereals cultivation is decreased by 57108 hectares compared to previous year.

Mining

Afghanistan is rich in mineral resources and offers potential for considerable future development. Coal, natural gas, salt, marble and liquid ammonia has been commercially exploited in the past. There are deposits of iron barites, talc and significant reserves of copper, and also there are some oil reserves. Total value of mining in 2018 increased by 5.8 % compared to 2017.

Electricity

Electricity in the country is being produced through hydro, diesel, and thermal powers station.

Electricity production in 2018 compared to 2017.

Gas

Natural gas is potential source but unfortunately the data is not currently available.

Since domestic gas is not sufficient for the country therefore some amount of gas for cooking, heating and lightening purposes is imported from other countries that is 153.2

Data on foreign trade indicates that in 2018-19 value of registered imports are 7407 million and that of exports are 875 million only. However, the values of imported goods are 7439 million and exports are 775 million in 2017-18. This indicates Decrease in the imports by 32 million or 0.4 percent and in exports by 101 million or 13 percent compared to the previous year. It is worth mentioning that the total imports include 289.3 million of electricity imports.

As concerned about communication, there is a positive development. Meanwhile, the data obtained reveal that 33.3 million SIM cards were sold by various mobile phone companies in the country during 2018-19.

The air transportation data in 2017-18 indicate that the government airlines named Ariana has transported 962 tons of goods whereas the private airlines have transported more passengers compared to Ariana Afghan Airline.

Construction

The total number of fully constructed buildings are 437 units have value of 13.01 Billion Afghanis while the number of under construction buildings are 476 units with the total value of 25.19 Billion AFN in 2018.

Population

The structure and size of the population are principle components in the development planning, which are to be considered while designing development plans and programs.

The total population of Afghanistan in the year 1397 (2018-19) was estimated around 31.6 millions of which 51 percent are males and 49 percent females.

Distribution of population between urban, rural areas shows that out of the settled population 22.6 millions are living in rural areas and 7.5 millions in urban areas. In addition, 1.5 million are living as nomads.

The most striking feature of the Afghan population is its very young age structure. Whereas 47.8 percent (15.1 millions) are under the age of 15 years, 65 and above are around 2.7 percent. The proportion under 15 is among the highest in the world and significantly higher than that of the neighboring countries.

This young population contributes to a very high dependency ratio for every 100 persons in the working age 15-64, there are 101.9 persons in the less productive ages, under 15 and over 64.

Based on 2003-2005 household listing data, and population census 1979, the growth rate of Afghan population was calculated as 2.14 percent per annum. Population growth due to rural- urban migration is higher in urban areas.

Table 2-1: Country Population by Sex and Age Groups in 2018-19

National Accounts

Gross Domestic Product (GDP) (data provide an overview of the country's economy and examines the composition of economic activities and of the interaction between different economic entities.

GDP – Nominal and Real

To Present economic condition of the country, the 2015-16 GDP for Afghanistan is compiled in two categories; GDP including poppy and GDP excluding poppy.

GDP including poppy was Afs 1,478,707 Million (US\$ 20.5 billion) with GDP per capita of Afs 46,795 equal to US\$ 647.

GDP excluding poppy was Afs 1,438,691 Million (US\$ 19.9 billion) with GDP per capita of Afs 45,528 equal to US\$ 630.

The growth rate of real GDP including poppy in 2018 was -0.2%, while it was 2.7% excluding poppy.

Sectoral performance

Agriculture

The agriculture value added estimated, that was Afs 302,450 million including poppy while without poppy was Afs 267,653 million 20.4 and 18.6 percent of GDP in 2018 respectively. Whereas the Share of Agriculture sector has reduced by -10.3 and -0.9 percent in 2018 compared to last year.

Industry

Based on International Standard Industrial Classification (ISIC) Industry is comprised of mining and quarry manufacturing, electricity, gas, water and construction.

The value added for this sector was Afs 347,050 million in 2018, which shows the growth of 7.6 percent over the last year. The main share in growth of this sector was the increase of construction by is 12.6 percent.

Mines and quarry

The value added for this sector was Afs 15,630 million in 2018.

Despite having numerous mines in Afghanistan it has not been extracted yet.

The efforts are underway to extract copper, iron, gold and other minerals but it has not started yet.

Electricity, water and gas

The value added of electricity was Afs 1,150 million in 2018 which shows decrease in growth by -5.5 to last year.

Construction

The value added for construction was Afs 173,006 million in 2018 showing increase of 12.6 percent.

Services

The value added for the service sector in 2018 was Afs 761,596 million which shows increase of 1.2 percent . The service sector share in GDP was 51.5 percent in 2018 while it was 51.0 % in the last year.

GDP by expenditure categories

In 2018, the total final consumption expenditure was amounted to Afs 1,349,325 million of which government consumption was Afs 183,431 million and private consumption was Afs 1,165,894 million. Expenditure on gross domestic fixed investment was Afs 325,528 million and exported of goods and services was Afs 120,387 million. The total amount of imported goods and services were Afs 633,345 million in 2018.

Agriculture Development

Afghanistan is an agricultural country of the total area 3 percent is forest and arable area is 12 percent and land under permanent pastures is 46 percent. Remaining is mountain and constructions (39 percent). There are cultivation plant by land face water and rainfall. Rain fed wheat is important for cereal production. Wheat is the major crop for production of cereal. Wheat constitutes of 88 percent consumption. Fruits including watermelon and melon apricot pomegranate, grape produced for consumption and export, also dried fruit and nuts especially apricot and almond is important for export.

Major crops

Grain

Wheat is a major crop. Cultivated every year on irrigated and rain fed land. Wheat production in 2018 was 3.61 million tons, rice production was 0.35 million tons, barley production was 0.06 million tons and maize production was 0.11 million ton.

Also, the total land under grain cultivation was 1970291.

Vegetable

Vegetables are mostly grown for market and home consumption. An estimated 11.6 percent of the total irrigated land was planted with vegetables, the total area under potato cultivation was 32.4 thousand hectares while its production was 615.7 thousand tons, and potato yield was 19 tons per hectare. Potato and onion are major vegetables, they are particularly used as food in the country. The area under onion cultivation in 2018 was 10551 hectares.

Fruits

Major varieties of fruit trees are apple, pomegranates, apricots, mulberries, grapes and almonds.

In 2018 almost 2.7% of the arable land (216 thousand hectares) was under fruit cultivation. Grapes production was 984 thousand tons. Almost all farming households in the rural area have some fruit trees for self-consumption. In addition, orchards are also a major source of income for farmers in many areas of the country and the majority of large to medium sized orchards are exclusively for markets.

Industries

Most industrial production are produced for domestic consumption for example chemical fertilizer , cement medicine , wheat flour , bread and other bakery products , dry fruit process , salt , soap , toilet paper , etc. The value of industrial production is 8220.2 million AFs in 2018 which contains 7276.8 million AFs of private sector and 943.4 million of governmental sector comprises

Mining

Afghanistan is rich in mineral resources and offers potential for considerable future development. Coal, natural gas, salt, marble and liquid ammonia has been commercially exploited in the past. There are deposits of iron barites, talc and significant reserves of copper, and also there are some oil reserves. Total value of mining in 2018 increased by 5.8 % compared to 2017.

Electricity

Electricity in the country is being produced through hydro, diesel, and thermal powers station. Electricity production has decreased by 10.9 percent in 2018 compared to 2017.

Gas

Natural gas is potential source but unfortunately the data is not currently available. Since domestic gas is not sufficient for the country therefore some amount of gas for cooking, heating and lightening purposes is imported from other countries that is 153.2 million cubic meters in 2018.

Construction

The total number of fully constructed buildings are 437 units have value of 13 Billion Afghanis while the number of under construction buildings are 476 units with the total value of 25 Billion Afghanis in 2018.

Services

Land Transport

Afghanistan transportation system includes both land and air transpiration in 2018. The total number of registered vehicles was 1,951,428 in 2018. It contains 1,196,031 Passenger cars, 323,943 Trucks, 106,947 buses and 321,992 other types of vehicles.

Air Transport

Afghanistan has four international airports and some other local airports, whereas only three of them are asphalted. The number of flights has been increasing substantially after the end of war in late 2001. Ariana Afghan Airline has four functioning airplanes. These airplanes carried 295 thousand passengers and 962 tons of goods via different routes. In private sector, one airline company Kam Air is active, with 12 airplanes, carried 649 thousand passengers via different routes.

Communication

Communication has rapidly developed after the end of the war. During last thirteen years the number of fixed line telephone subscribers has increased substantially. In 2018 the number of fixed line telephone was 510,186.

Inflation and Consumer Price Index

The main purpose of the consumer price is change in consumer price level and measure of consumer price inflation for the data users. The CPI and its monthly movements are used as key targets for monetary and fiscal policy, as well as adjusting for inflation in business contracts, employees' salaries and retirees' pensions and other social issues.

A Brief Explanation on the CPI Used Methodology

The National CPI follows international recommendations with regard to the concepts, classifications and formula used. It is a weighted aggregate of the CPIs for Kabul, Herat, Kandahar, Jalalabad, Mazar-e-Sharif, Khost, Helmand, Bamyan, Kunduz, Badakhshan, Takhar, Paktya, Parwan, Ghazni, Ghor, Kapisa, Sare Pul, Jowizjan, Baghlan and Faryab. The basket includes 290 important goods and services, typically consumed by urban middle and low-income households. For each item, prices are collected from three shops located in the central markets or main shopping streets of each city. A total of about 20010 price quotations are obtained each month. The Laspers formula is used to calculate the CPIs.

National CPI 2018

The inflation rate measured by the overall consumer price index (CPI) for the country was 0.6% in 2018, whereas it was 5.0 % in 2017.

Food Prices Index

The national overall prices for food had decreased by 1.1% in 2018 as compared to 6.9% increase in 2017.

The highest decrease was in Nangarhar by 8.5% and followed Parwan (5.3%).

The main contributory factors to the decrease in the national CPI were vegetable by 10.4%, sugar and sweets by 6.8% and spices by 17.4%.

Non-food prices Index

The national non-food prices increased by 2.3% in 2018 which increased by 3.2% in 2017. The main contributory factors to the increase were tobacco by 4.1%, clothing by 3.5%, and transportation by 6.6% and education by 5.8%.

In 2018 the highest increase of prices was in Kapisa province by 5.8% followed by Helmand province (5.3%).

Terms and concepts of Statistical Yearbook

These technical notes discuss the data, sources, and methods used to compile the indicators in this publication. The notes are organized by table and within each table, by indicator in order of appearance.

Demographic and social statistics

Life expectancy at birth is the number of years a new born infant would live if prevailing patterns of mortality at the time of his birth were to stay the same throughout his/her life.

Population

Population refers to a group of people who at point of time live in a geographic area such as a continent, a country, a city, a village etc.

Population density

Population density is an important indicator which shows the relation between the size of population and the area the population is living in the simple indicator of population density is calculated by dividing population of one area by its total geographic area.

Population growth

Population growth is the change (increase/decrease) in the size of population during a specified time interval which is usually presented as percentage.

Fertility rate (total) is the average number of children that would be born alive to women during her reproductive life, if she were to bear children at each age in accordance with prevailing age-specific fertility rates.

Literate population is defined as the proportion of the population of age 15 and above who can read and write to the total population fifteen and above.

Under 5-mortality rate is the probability that a newborn baby will die before reaching age 5

Crude birth rate

Is annual number of births per 1,000 populations.

Crude death rate

Is annual number of deaths per 1,000 populations.

Adult literacy

Is defined as ability of an adult person who can, with understanding, read and write a short, simple statement on their everyday life.

Access to health care

Is measured by the share of population for whom treatment of common diseases and injuries, including essential drugs on the national list, is available within one hour's walk or travel.

Access to safe water

Shows the percentage of the population with reasonable access to adequate amounts of safe water (including treated surface waters or untreated but uncontaminated water from sources such as springs, sanitary wells, and protected boreholes). In an urban area such a source may be a public fountain or stand post located not more than 200 meters away. In rural areas access implies that members of the household do not have to spend a disproportionate part of the day fetching water.

Access to sanitation

Refers to the percentage of the population with at least adequate disposal facilities that can effectively prevent human, animal, and insect contact with excreta.

Child immunization

Measures the rate of vaccination coverage of children under one year of age for four diseases—measles and DPT (diphtheria, peruses or whooping cough, and tetanus).

National Accounts

The SNA provides a framework for presenting a coherent, consistent and integrated set of macroeconomic accounts, balance sheets and tables. The SNA is found on the concepts and principles of macro-economic theory and the framework is based on a set of internationally agreed concepts, definitions, classifications and accounting rules. It also provides for recording the interactions between different economic agents and groups of agents like households, business companies, government and non-profit institutions who are involved in economic activities. The estimates of macro-economic aggregates compiled in the framework of SNA are called National Accounts Statistics (NAS).

International Standard Industrial Classification

The International Standard Industrial Classification of Economic Activities (ISIC) is the international reference classification of productive activities. Its main purpose is to provide a set of economic activity categories that can be utilized for the collection and reporting of statistics according to such activities.

Gross Domestic Product

Gross Domestic Product is the monetary value of goods and services produced in a country territory during an accounting period.

GDP is the sum of Gross value added of all residents producer unites within the economic borders of country during a given period of time.

Gross value added

Gross value added is the sum of output minus intermediate consumption of a production process.

Intermediate consumption

Intermediate consumption is the value of goods and services consumed as inputs in the production process.

GDP per capita

GDP per capita is the Gross Domestic Product divide by the total population in current year.

Gross National Income

Gross National Income is GDP plus primary incomes receivable from abroad less primary incomes payable to abroad.

Current Price

Current Price is the monetary value of goods and services at a certain accounting period at the time when the transaction took place

Constant Price

Constant Price is the monetary value of goods and services that takes place at a certain accounting period at a base year period.

Base period

The period that provides weights for indexes is described as the base period and other periods or years compared on it.

GDP price deflator

GDP price deflator is calculated by dividing annual GDP at current price by the corresponding GDP at constant price.

Key sectors in GDP**1- Agriculture**

Corresponds to ISIC Agriculture includes cereals, fruits, livestock, forestry and fishing.

2- Industry

This sector includes mining, manufacturing, energy (electricity, gas and water) and construction.

3- Services

This sector includes value added in all other branches of economic activity, i.e. transportation and communication, wholesale and retail trade, hotels and restaurants, banking, insurance, real estate, ownership of dwellings, public administration and defence, NGOs, professional, and personal services including domestic help, education, health care, garage, repair, and other services.

GDP Compilation Approaches

GDP can be compiled by three approaches, namely production, income and expenditure.

1-Production approach

Production approach is the total output minus cost of input good or intermediate consumption (IC) that used in production process.

2-Income approach

The second approach to estimating the value added of different kinds of economic activity consists of summing estimates of its components, that is:

- The compensation of employees or wages and salaries and other benefits (WS),
- The operating surplus, or mixed income (OS),
- The consumption of fixed capital (CA) and
- The net indirect taxes (NT).

In the case of producers of government services and NGOs, the operating surplus is not applicable.

3-Expenditure approach

Expenditure approach involves making independent estimates of the final consumption of the private sector, government, change in stocks, gross fixed capital formation, and imports and exports of goods and services.

Total final consumption expenditure

Total final consumption expenditures the sum of private and government consumption.

Government consumption

Government consumption includes all current expenditure for purchases of goods and services by all levels of government.

Private consumption

Private consumption is the value of all goods and services purchased or received as income in kind by households and non-profit institutions.

Capital formation

Capital formation is that part of current output of the economic activities and imported goods which is not consumed or exported during the accounting period but set aside as addition to Fixed Assets and stock of capital goods.

Fixed capital assets

Fixed capital assets are:

- Durable goods that last more than one year.
- For the purpose of production or generating income
- Cost more than US\$300
- New construction and major improvements which extend its life period.
- Reclamation and improvement of land and the development and extension of timber tracts, orchards, plantations and similar other agricultural holdings.

Factor services

Factor services comprise income of labor and capital, thus covering income paid to non- resident workers and investment income (receipts and payments on direct investment, portfolio investment, and other investment, and receipts on reserve assets).

Non-factor services

Comprise services on account of freight and insurance, passenger services other transportation travel and other goods and services. These include transactions with non-residents by government agencies and their personnel abroad, as well as transactions by private residents with foreign governments and government personnel stationed in Afghanistan.

Gross domestic savings

Gross domestic savings are calculated as the difference between GDP and total final consumption expenditure.

Consumer Price Index

The CPI describes the movements of the general price level of goods and services bought by households.

Exchange rate

Exchange rate is the prices of per foreign currencies unite versus local currency by the free market vendors.

Total domestic revenue

Total domestic revenue is the sum of tax and non-tax revenue.

Tax revenue

Tax revenue is the sum of direct and indirect taxes.

Direct taxes

Direct Taxes are the taxes that are levied on the income of individuals or organizations.

Indirect taxes

Indirect taxes are those paid by consumers when they buy goods and services.

Import duties

Import duties consist of customs duties, or other import charge, which are payable on goods of a particular type when they inter the economy territory.

Wage and salaries

Wage and salaries consists of all payment in cash, but not in kind, to employees in return of services rendered, before deduction of withholding taxes and employees' contributions to social security and pension funds.

Agriculture

Work and activities of agriculture and agricultural exploitation of the land, livestock, and forests as well as fishing.

Agricultural area

To the land that gets called at the high levels of domains that have been without ups or downs, natural shape on plants flourish and livestock of fodder used it.

Irrigated area

Agricultural land that is included in the length of the season by one of the water sources, such as the sea, springs, irrigation etc

Cultivated rain fed area

The land that is necessary for their water supply through the rain.

Arable land

Is applied to lands that are practically under cultivation plants one year or several years old.

Irrigated land

included on the land under temporary crops plants, meadow of the temporary pasture , garden .

Permanent pasture

The land is applied in the scope of the high levels of a Downs or without downs is supposed to, In that natural plants to form inner essence and stock of the forage use it.

Gardens

It is said that the area plants, planted in several years and included fruitful trees and non fruitful, ornamental plants and vineyards.

Forests

The land it is said that in their natural form to different trees such as needle leaves and other plants stem, and bushes.

Other land

In other words it is the land of the direct use in agriculture has been no and in other cases the Use lands are like rivers, mountains, roads and the industrial centers, oasis and etc.

Total energy use

The use of the Renewable Energy generator like electricity, oil and gas, fuel ,wood and traditional fuels .

Industry

Industry in the sense of, business and art general purpose made a change in the form or the combination of materials.

Industrial sectors

In statistical yearbook for classification of industrial production use ISIC code version 4 .

Foreign trade

Foreign trade refer to transfer of goods and services(imports and exports) between world countries.

Exports

Export means to send or send goods from inside the country to country. In this collection of export export of goods from customs territory country is intended.

Imports

Imports in the meaning inside of goods and services inside the country from other countries , in this one collection to import within the customs territory to goods intended country.

Trade balance

Is the difference between exports f.o.b. and imports c.i.f

Foreign support

Economic aid include grants and loans of the foreign long-in order to use In the field of civilian by the government or international organizations

Aid

Aid payments payable included mostly is that related to the emergency at the time of the occurrence of events Like natural earthquake, flood, only count and etc. takes place and recipient required to help pay the they will not be.

Loan

Debt payments include loans recipient is required to pay back to them.

Bilaterally Aid

The help of the two bilateral assistance that responsibility to its executive responsibility of national institutes and is based on the agreement are , country to country..

Multilaterals Aid

The help that responsibility for it to be responsible for the international institutions in general as a multilateral aid It is known as.

The difference between the help of bilateral and multilateral aid is directly between bilateral The Government change over will be while in the multilateral help a the International Institute for between the two governments of help to a recipient through action.
